## Vinyl Windows & Patio Doors

Premium | Premium Atlantic | Builders | Brickmould | Flat Casing

# MEET THE WINDOWS THAT MAKE LIFE EASIER

Reliable JELD-WEN® Vinyl windows and patio doors are energy efficient, secure and most importantly, low-maintenance. Each one of our windows and patio doors is built to last. We prove this by supporting each product with our industry-leading lifetime warranty. Review the complete warranty at [www.jeld-wen.com/resources](http://www.jeld-wen.com/resources).

*This book provides an overview of all our vinyl products. To review our complete selection of styles and options, visit [www.jeld-wen.com](http://www.jeld-wen.com).*

# CREATING RELIABILITY

JELD-WEN® Vinyl windows and patio doors include features that ensure durability and lasting visual appeal. They're built from high-quality extruded vinyl that resists fading, so they never need to be painted and are virtually maintenance-free. All our vinyl windows are designed to meet the demands of the regions where they'll be installed.

## Neat® Glass

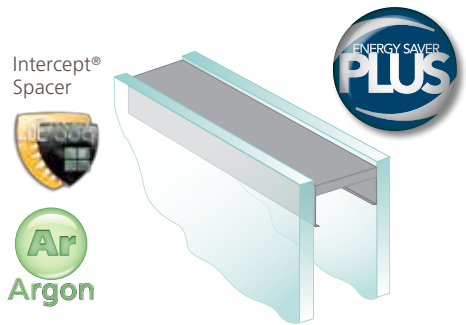

*Feature of Brickmould Vinyl, Builders Vinyl and Flat Casing Vinyl*

This glass option gives you the convenience of natural cleaning. By harnessing the sun's UV rays (even when the sky is cloudy) to loosen dirt from the glass, rainwater can easily rinse away grime. No manual activation is required. For more information, visit [www.jeld-wen.com/neatglass](http://www.jeld-wen.com/neatglass)

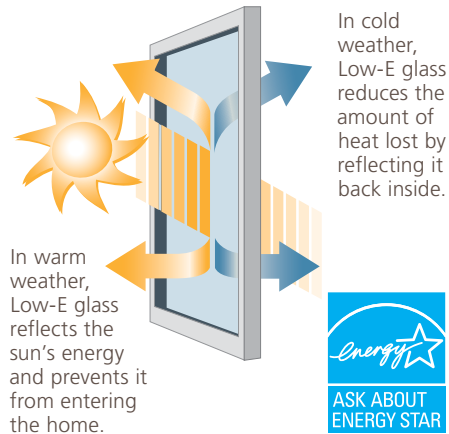

## Energy Saver® Plus

The best value in insulating glass, Energy Saver® Plus includes a thermally improved spacer system that reduces heat transfer through the edge of the glass, argon gas for improved thermal performance and LoE-3-366 glass. With triple layers of Low-E coating, LoE<sup>3</sup>-366 helps you save energy through improved thermal performance, reduces solar heat gain and helps protect interior furnishings from fading.

## Low-E and LoE<sup>3</sup>-366 Insulating Glass

Our standard high-performance Low-E insulating glass lowers energy costs, helps homes stay cooler in the summer and warmer in the winter, prevents fading of interior furnishings, and reduces condensation. It also delivers greater visible light transmittance than tinted glass. We also offer optional LoE-3-366 glass, which provides more protection against solar heat gain, as well as greater energy savings. Windows and patio doors with Low-E or LoE<sup>3</sup>-366 glass are ENERGY STAR® qualified, which means they exceed the minimum energy efficiency criteria for the climate region you live in (by as much as 40 percent). For more information, visit [www.jeld-wen.com/energyefficiency](http://www.jeld-wen.com/energyefficiency)

# ENSURING SECURITY & STYLE

## MAG-Lock®

*Feature of Premium Vinyl*

With MAG-Lock, the industry's first magnetic one-touch automatic lock, our Single-Hung and Sliding windows are more secure and easier to use. The integrated, ergonomic pull handle makes it easy to unlock and open the window in one movement, and it locks automatically in the closed position —creating an audible click. For added security, the lock is only visible from the inside of the home. For more information, visit [www.jeld-wen.com/maglock](http://www.jeld-wen.com/maglock)

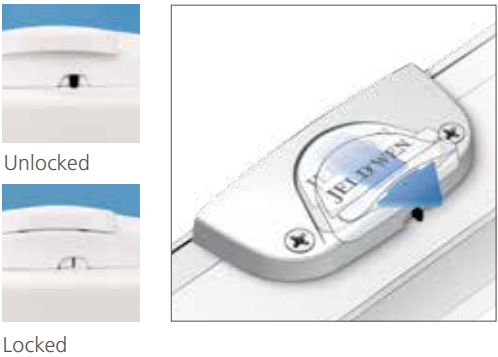

## WEN-Lock®

*Feature of Brickmould Vinyl, Builders Vinyl and Flat Casing Vinyl*

Single-hung and slider windows lock automatically with WEN-Lock. This locking system has a slim profile that's easy to engage, as well as a tamper-resistant design. In fact, this lock has passed all forced-entry resistance tests. It also includes a visible latch indicator (VLI) that lets you know if a window is locked; the VLI can only be seen from indoors.

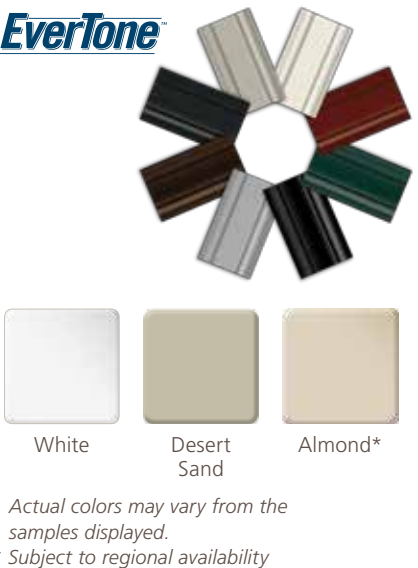

*Also available with an ADA compliant option.*

## Design Options

With JELD-WEN® Vinyl windows and patio doors, you'll enjoy an ample assortment of design options. This includes our versatile, enduring vinyl color choices. Or for even greater visual appeal to Premium Vinyl windows and patio doors, choose EverTone™—an exterior color process engineered to provide unparalleled resistance to the elements in a selection of hues designed to remain vivid. You can also select a divided lite option with either flat or contour grilles in various sizes and patterns. For options available in your area, contact your local JELD-WEN dealer.

We offer two internal grille options. Flat grilles feature a clean look, and contour grilles offer added character.

# WINDOW OPENING CONTROL DEVICE

## JELD-WEN® WOCD Meets ASTM F2090-10 Standard

Windows add so much to our daily lives - daylight, ventilation and views. They can also be necessary for emergency escape and rescue, so the building codes in your area may require certain windows to fully open. This means homeowners should take measures to prevent window falls. Factory-installed Window Opening Control Devices (WOCD) from JELD-WEN are designed to meet the ASTM F2090-10 standard intended to help prevent accidental falls from windows by children five years of age and younger. A WOCD automatically limits the sash opening to less than 4 inches, unless it is deliberately disengaged, allowing the sash to fully open. The streamlined design of the JELD-WEN WOCD won't obstruct views and preserves the beautiful appearance of your windows, unlike many after-market window guards. Factory-installed WOCDs can be ordered on the Double-Hung, Single-Hung, Sliding and Casement windows.

Window in closed position

Window in open position with sash limited

## Secondary Stops\*

*Feature of Premium Vinyl*

Popular flip-out vent stops limit sash opening to 4 inches, providing fractional ventilation on Single-Hung and Sliding windows. A nylon lever and housing allow quick and easy release when the vent stop flips open. The lever flips back with an easy push of the finger when not needed.

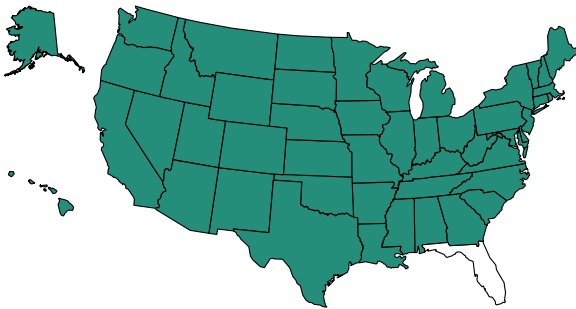

*\* Secondary stops are not a locking feature.*

# MAKING THE RIGHT CHOICE

Regardless of where you live, we offer the perfect products and options to meet your region’s specific performance and architectural needs. See which JELD-WEN® Vinyl windows and patio doors are available in your area, and then learn more about those products by referencing the page number under each collection’s availability listing.

## PREMIUM VINYL WINDOWS & PATIO DOORS

### Remarkably Versatile

For low-maintenance durability and generous design options, choose Premium Vinyl windows and patio doors. Each one is available with optional even sight lines that create a clean, architecturally accurate look. This allows them to be used seamlessly in combination with JELD-WEN® Wood windows. They also offer character-enhancing options that will coordinate with any architectural style. With a DP 35 rating, these windows are appropriate for commercial applications.

# FLAT CASING VINYL WINDOWS AND PATIO DOORS

## Lasting Authenticity

With Flat Casing Vinyl windows and patio doors, the look of traditional wood windows is within reach. Each window features a sloped sill and three full sides of 3-1/2" casing for architectural accuracy; coordinating patio doors include flat casing on the sides of the frame. These products are ideal replacement options for American Colonial-style homes, and they can greatly reduce the cost of exterior trim for new homes.

**Product Availability:**  
To see if this line is available in your state, refer to the map on page 13.

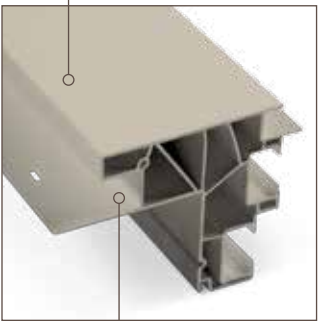

## Available Styles

Awning, Casement, Double-Hung, Fixed, Radius and Geometric, and Sliding Patio Doors

## Key Features

- » Colors: White or optional Desert Sand
- » 3-1/2" flat casing
- » Architecturally correct sill nosing
- » Frames come standard with integral flat casing J-channel
- » ENERGY STAR® qualified with standard energy efficient Low-E glass
- » Optional grilles between the glass (GBG) with 5/8" or 7/8" flat or 5/8", 7/8" or 1" contour grilles
- » Optional Window Opening Control Device (WOCD) available

Color: Desert Sand

The integral flat casing J-channel allows siding to slip between the casing and nailing fin for a clean look.

Double-Hung Window, Color: White

**Optional Window Opening Control Device (WOCD) Available**  
Meets ASTM F2090 standards. Flip-out vent stops limit sash opening to 4 inches, providing fractional ventilation.

Flat grille
